

### We Are Expert In

#### Business Application Development

SoftcommTechnology develops the business applications to get things done efficiently with your business.If you are a business owner, you would want to get things done efficiently with as little time possible. In order to reach this, you cannot fulfill it by yourself. You would need the help of software and applications used in business if you want to multi-task. **SoftComm Technology** can give you information to assist you in understanding business application thoroughly.

#### Domain and Hosting Services

A domain name is a way to identify and locate computers and resources connected to the Internet. No two organizations can have the same domain name. Every company or organization that wants to be on the internet needs to register a domain name for use as their on-line identity or name that clients will use to access on-line services such as the organization's website or email system. If you are going to make a website with us, you don't need to buy web hosting separately. Our website packages bundle come with

#### Domain and Hosting Services

A domain name is a way to identify and locate computers and resources connected to the Internet. No two organizations can have the same domain name. Every company or organization that wants to be on the internet needs to register a domain name for use as their on-line identity or name that clients will use to access on-line services such as the organization's website or email system. If you are going to make a website with us, you don't need to buy web hosting separately. Our website packages bundle come with domain and hosting along with all packages.

#### Websites & Web Application Development

Web development can include web design, web content development, client liaison, client-side/server-side scripting, web server and network security configuration and e-commerce development. Web development can range from developing the simplest static single page of plain text to the most complex web-based internet applications, electronic businesses or social network services.

#### E-Commerce Solutions Development

Electronic commerce, commonly known as e-commerce, is the buying and selling of product or service over electronic systems such as the Internet and other computer networks. Electronic commerce draws on such technologies as electronic funds transfer, supply chain management, Internet marketing, online transaction processing, electronic data interchange (EDI), inventory management systems and automated data collection systems.

#### Data Entry Services

We specialize in data entry services. When your company hires **SoftComm Technology** , we will develop a service plan for your specific data entry projects and forms processing requirements. Our approach to data entry and the technologies we employ enable us to deliver the highest levels of data quality.
